6. Discussion and Possible Recommendation Regarding Wastewater Plant Equipment Replacement (UV System & Sludge Pump)

Weter reviewed the LW Allen proposal. Total cost is \$58,600 for pump. The Trojan UV proposal is for the UV system that has failed. \$162,600 is the total cost to upgrade/repair the wastewater system which would come out of the equipment replacement fund. There was not an RFP for bids because LW Allen matches our current system. LW Allen has been the most cost effective over the years. UV System needs to be completed by May 1st. The pumps have to be completed in about 20 weeks time. Clemens asked if the \$160,000 is removed from the replacement fund is the balance remaining going to be sufficient. The fund will need to be replenished. The pump and UV system are original to the system.

MOTION (Hansen/Clemens) to recommend to council approval for equipment for the Wastewater Treatment Plant \$162,600. Roll Call vote: Aye (Clemens, Hansen, Stevenson); Nay (0). **Motion carried.**
