

## **Comments from City Attorney Regarding Easement for Underground Communication Lines- Golf Club**

I reviewed the proposed easement and have no big concerns.

A couple of comments concerning paragraph 1. From where I think the easement area is, it will be very difficult to have poles and towers within the easement. This is likely standard language, but the City may want to ask these words be removed. The last sentence of paragraph one states that the operator will not remove underground cables or lines when the easement expires. I don't know if inactive cables may be a problem for other users of the area as to require them to be removed.

Otherwise, not big concerns.
