Terry,

Thank you for clarifying. The cost estimate to research parcel records, determine the floor elevation of the shelter and prepare a plat of survey map, outlined as items 1, 3 and 4 of your initial email is \$3450.

Please note we do not prepare title searches, so this request would need to be outsourced to a title company. I will be happy to assist in contacting a title company for providing an estimate for their services as we proceed forward with the project.

Regards,

Scott Hewitt, PLS
